# ABOUT 3D-PRINTFARM.DK

*From file to product in no time.*

## The 3D-Printfarm .dk steps

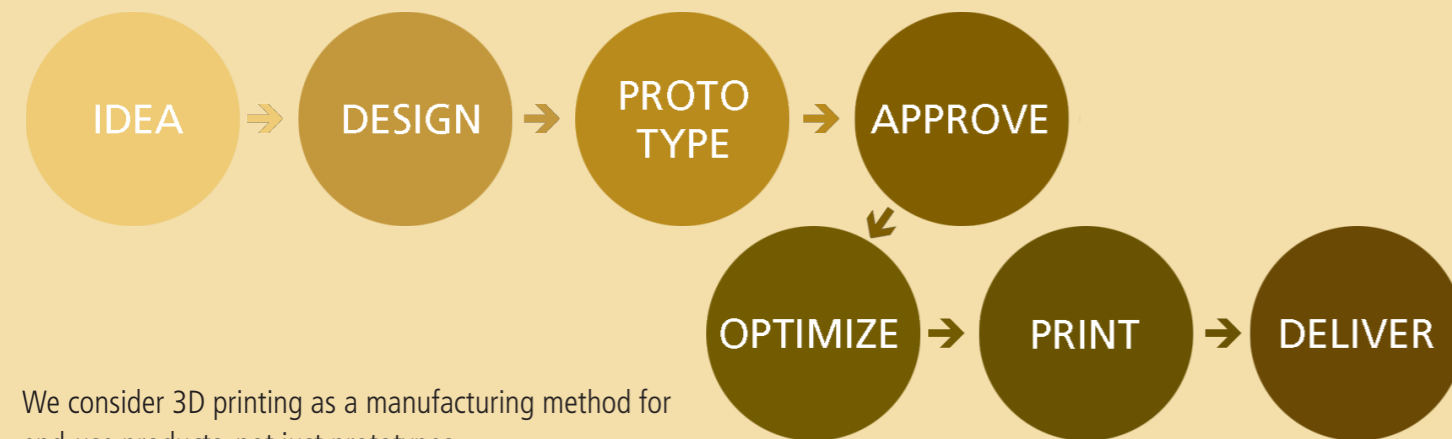

Harvest the advantages of AM technology, giving you flexibility in your design process and minimizing turnaround time. You will be able to, without consequences, change and optimize your product as it evolves through market feedback and customer reviews.

No longer will you be limited by tooling costs and manufacturing limitations such as shape and tool access.

# ABOUT ADM-FACTORY.DK

*Full service from idea to mass production*

## The ADM-Factory.dk steps

We consider 3D printing as a manufacturing method for end-use products, not just prototypes.

Our ADM engineers have the knowledge and expertise to optimize your design for print.

We are capable of replacing complex, expensive and time-consuming tooling, with fast and flexible manufacturing of intricate items in multiple colors and materials.

Additive technologies allow us to overcome many design- and process-related limitations of conventional production. In order to fully exploit this potential and to make best

practical use of this freedom of geometry and design, an advanced level of specific additive engineering experience is needed.

With combined forces, your vision of the intended product plus our **Additive Design & Manufacturing (ADM)**, Engineering knowledge, we will develop tailored solutions for innovative and outstanding products together.

# WHAT WE CAN DO FOR YOU

### HIGH VOLUME PRINT

We have **60** printers, and growing, ready to mass produce your items.  
220mm x 220mm x 220mm

### LARGE SIZE PRINT

In a new department we print up to  
1.250mm x 600mm x 700mm

### KNOW HOW

Our engineers are ready to help you with ADM product optimization and ensure that your product requirements are met.

### DESIGN

Don't be limited by conventional manufacturing methods. Rethink your product to take advantage of ADM technology.

### PRODUCTION

We can produce a wide range of products with extremely flexible production sizes. No tooling and minimal setup costs.

### COMPETITIVE PRICES
